Hi Dante,

I am not available tomorrow.

Since everyone else, I don't need to be on the call.

Just keep me in the loop for resolution/path forward, particularly on any remaining questions on particulate monitoring.

My view on ARC responses to EPA comments is: they provided complete and satisfactory answers and I think their proposed particulate monitoring for a one-week period is sufficient.

I am satisfied with the project plans and protectiveness measures.

Thanks,

Jeryl

Jack and team,

Thanks so much for your responses to our questions. I would like to have a brief call tomorrow to touch on a few of the key topics. Let me know what time would be good for you guys, and I'll touch base with my Hill reviewers as well. Thanks!

Dante Rodriguez

Subject: Yerington - Enhanced Evaporation Dust Monitoring

Dante,

Attached are responses to EPAs comments regarding the implementation of Enhanced Evaporation at the Yerington site.

Please let me know if you would like to discuss or require additional information.

Arcadis is in the final stages of preparing the infrastructure and operation could begin as early as next week. I'm traveling and in meetings so please call my cell phone if you would like to discuss.

Thanks,

-jack
